

X-ROAD® 7

Dec 18, 2020 09:00 EET

X-Road® 7 "Unicorn" beta version released

The first beta version of X-Road® 7 "Unicorn" has been [released](#). The beta version of the Security Server software provides a sneak peek to the X-Road 7 look and feel.

The beta is a visually enhanced version that provides the same features as the latest X-Road 6.25.0 release. Beta versions with new features will be released in 2021 before the first production release.

X-Road is being developed iteratively using agile software development methods. All the changes in X-Road 7 will not be included in the first production version but in various minor versions over time.

X-Road is open-source software and ecosystem solution that provides unified and secure data exchange between organisations. X-Road is a digital public good verified by the [Digital Public Goods Alliance](#), and it's released under the [MIT open source license](#) and is available free of charge.

Nordic Institute for Interoperability Solutions (NIIS) is a non-profit association with the mission to ensure the development and strategic management of X-Road® and other cross-border components for e-government infrastructure.

NIIS is both a network and cooperation platform and executioner of IT developments in members' common interests. The institute focuses on practical collaboration, sharing of experience and promoting innovation. The operating model of the institute is something unique in the world.
